

Mango

AI Workflow Designer for Creative Production Systems

Anonymized portfolio for technical exchange | Open to AI Product / Workflow roles

Summary

Product designer combining AIGC workflow design, prompt systems, and lightweight prototyping.

Academic design background with hands-on AIGC creative production experience.

Focus: turning AI capabilities into structured, evaluable, reusable production systems.

Selected Work - self-initiated concepts

- AI Gift Generation Workflow - AIGC production pipeline with evaluation framework
- Asset Tagging & Review System - Searchable, evaluable generated asset management
- Brief-to-Prompt Prototype - Structured prompt components from a creative brief

Skills

AI workflow design, prompt systems, quality evaluation, agent prototyping,

Figma, Coze, Python logic, JSON data, workflow mapping, AIGC tools

Foundations

Interaction, spatial, and product/UI design work - archived on the Foundations page.
